ARK BUNKERS

PRICE CATALOG 2026

PRICES INCLUDE

FRP structural components, galvanized fastening systems (bolts, nuts, and expansion bolts), floor plan set, assembly guide, construction manual, and repair kit.

PRICES DO NOT INCLUDE

Foundation installation, electrical systems, plumbing, HVAC systems, doors and windows, interior flooring, interior walls, cabinetry, fixtures, appliances, water sealants, insulation, soil preparation, or garden coverings.

METAL-FREE COMPOSITE ENGINEERING AVAILABLE

Non-Metal Living is a design approach that replaces traditional metal components with advanced composites and high-performance polymers, including PEEK fastening systems, to eliminate corrosion, reduce electromagnetic interference, and maximize structural durability.

ARK BUNKERS

We are proud to present the most advanced technology based on cutting-edge polymers for the construction of high-security Modular Bunkers, also known as Bomb Shelters. Our bunkers are a patented technology, manufactured with aerospace-grade materials, both ultra-resistant and ultra-lightweight, making them easy to transport on pallets and containers, and ship to any destination worldwide.

FORTRESS – COMPACT

Total Interior Area: 131.31 Sqft - 12.20 mt2

This security module offers a comfortable space, ideal for four people. It can be equipped with bunk beds, a desk or work-table, bench seating, kitchenette, and bathroom. Access is provided via wide stairs and a secure steel door.

Standard: \$26,140

Anti-Ballistic: \$29,717

Anti-Missile: \$32,103

This module is delivered packed in three palletized boxes, ready to be shipped anywhere in the world. It can be assembled in just one day by a team of three people. The interior offers a spacious layout with an optimized design and a warm, inviting atmosphere that promotes peace and reflection, ideal for family gatherings in a secure space, hidden from the outside world.

KRATOS – SMALL

Total Interior Area: 178.33 Sqft - 16.56 mt2

This security module provides a spacious and comfortable area, ideal for four to six people. It is a versatile, multi-purpose space that can be adapted as a shelter and rescue area, a communications center, a secret room for safeguarding valuables, fine art pieces, weapons, and much more.

Standard: \$31,021

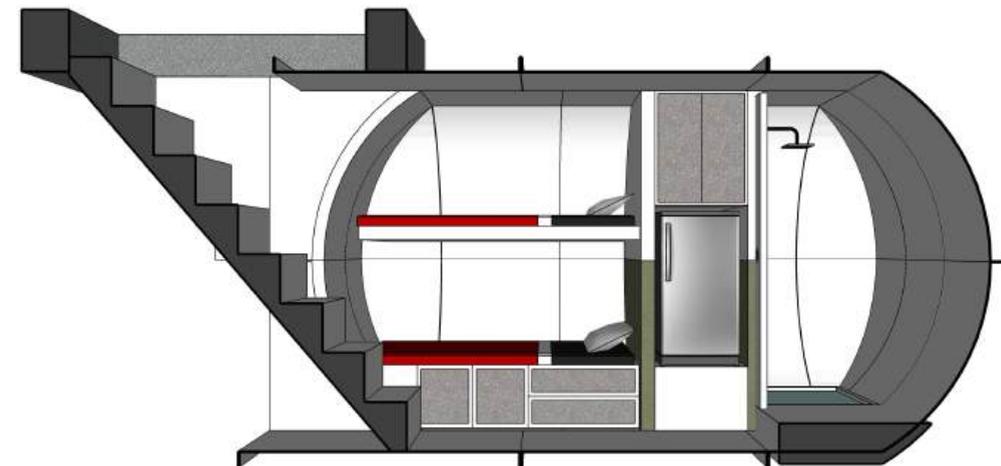

Anti-Ballistic: \$35,276

Anti-Missile: \$38,114

This model offers a spacious and comfortable interior, featuring a bunk bed, a kitchenette, a lounge chair, a work table, space for food refrigeration, a sink, a shower, and a toilet. It is designed with an ergonomic entrance to ensure easy access, even for elderly individuals.

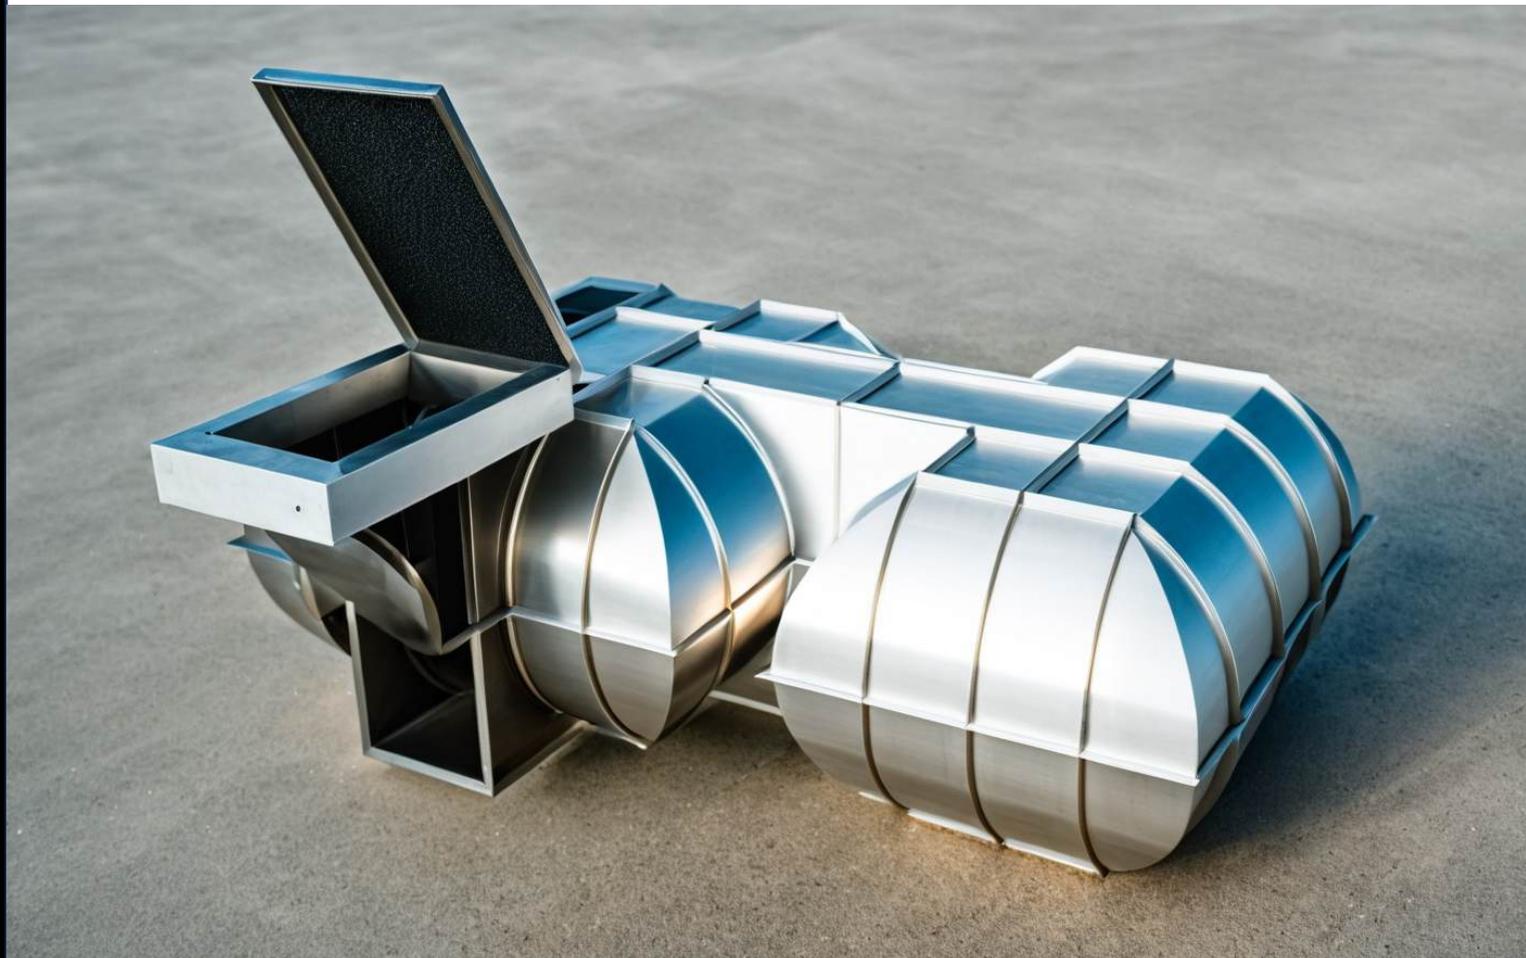

CHRONOS – MEDIUM

Total Interior Area: 317.85 Sqft - 29.53 mt²

This model is divided into two areas: a private bedroom that can accommodate either two queen beds or one king bed, and a spacious, comfortable social area that can be equipped with a full bathroom with three separate fixtures, a kitchenette, a living area, and a table or work desk, with a central space kept clear for circulation.

Standard: \$55,161
Anti-Ballistic: \$62,864
Anti-Missile: \$67,999

4.36 mt / 14.30 ft

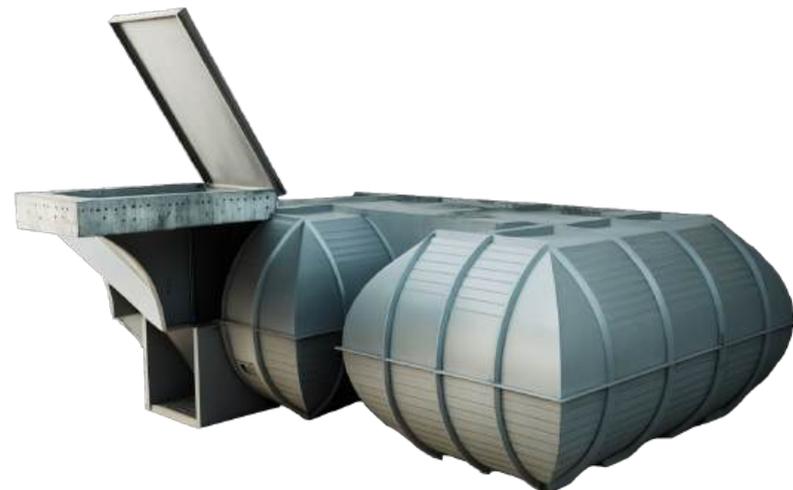

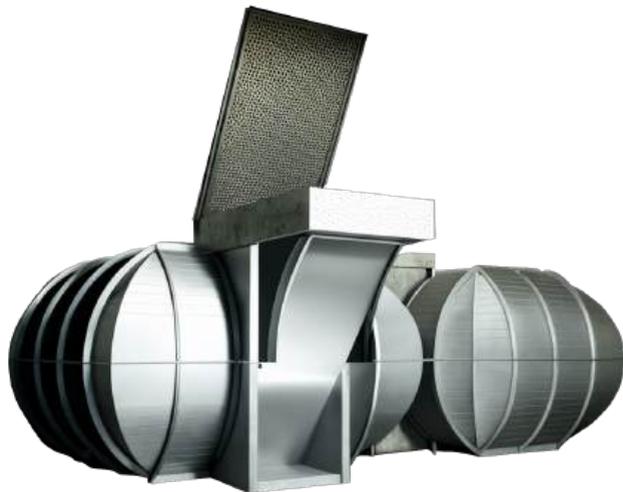

7.37 mt / 24.17 ft

2.80 mt / 9.18 ft

You can modify the interior layout as you wish, or we can design it according to your specific needs. Our technology creates clean and pristine spaces with washable walls and generous ceiling height, where you will feel as if you were in a comfortable living room, safely protected from any external danger.

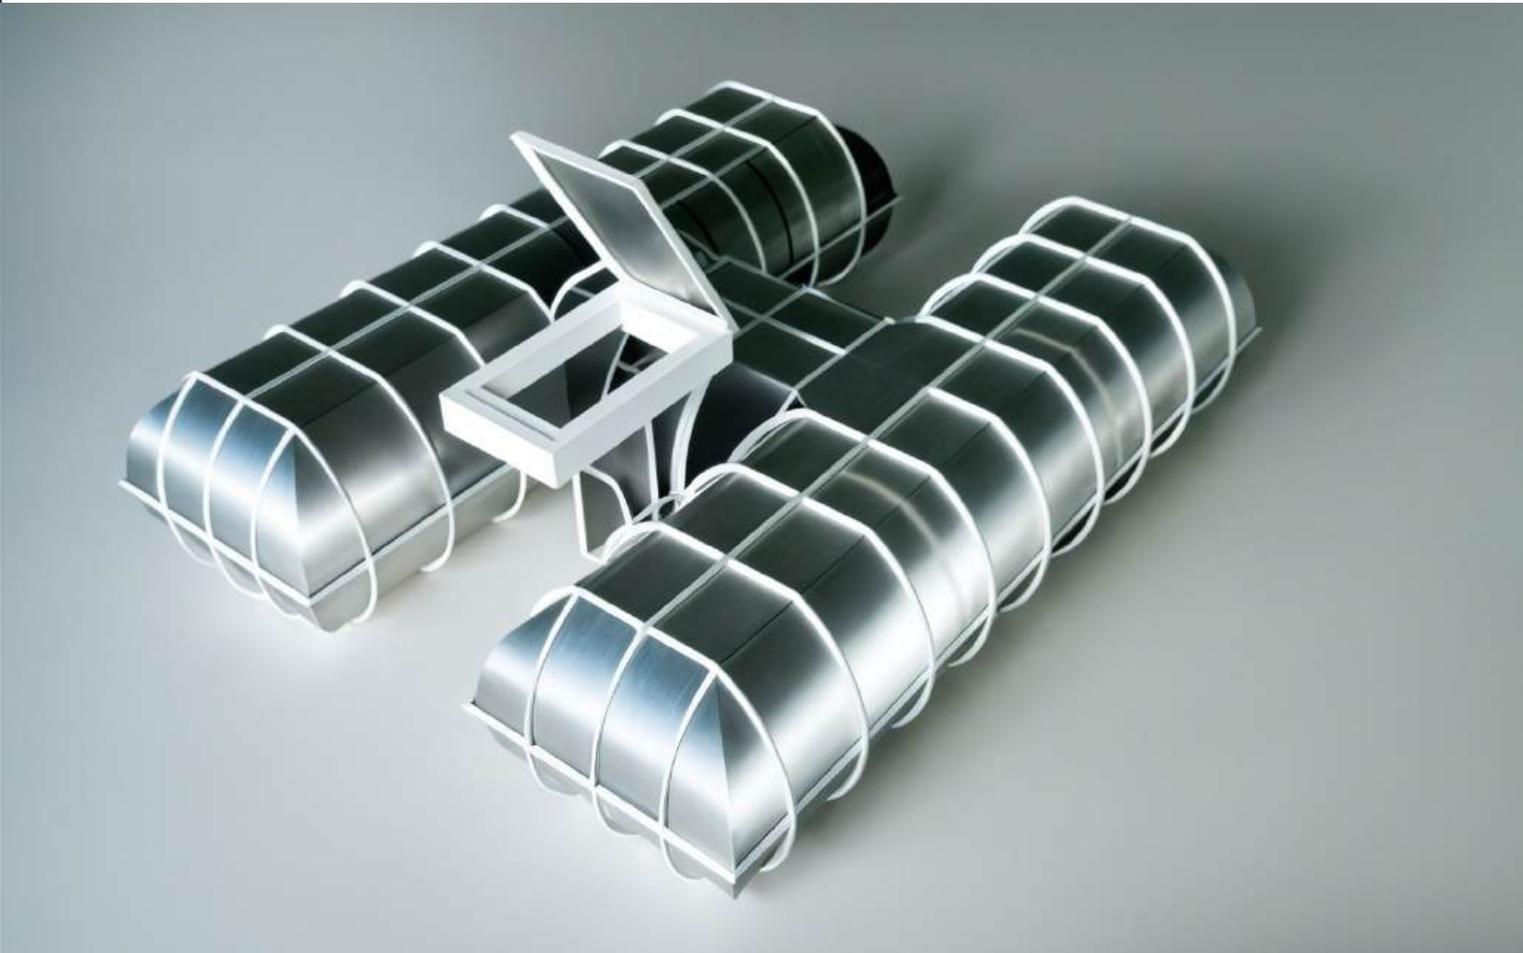

HYPERION – LARGE

Total Interior Area: 630.57 Sqft - 58.57 mt2

This robust bunker model is truly remarkable, offering a very comfortable experience thanks to its layout of two spacious areas, allowing for the creation of separate zones for resting, working, and socializing.

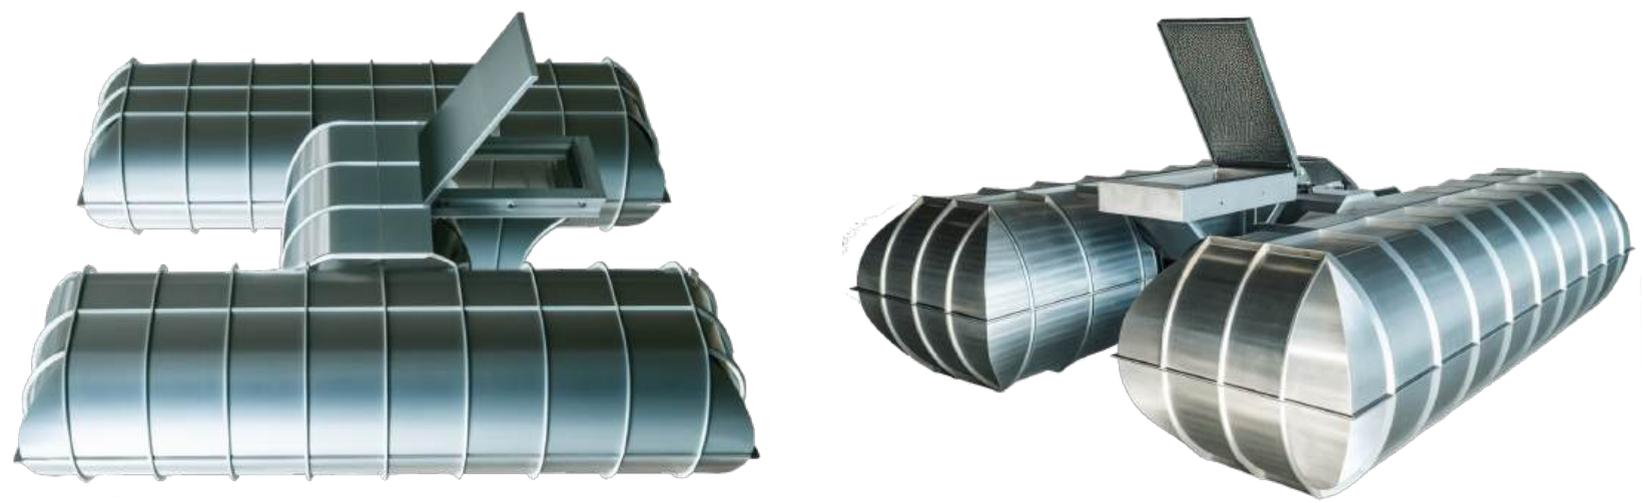

Standard: \$86,493
Anti-Ballistic: \$98,477
Anti-Missile: \$106,466

This beautiful model offers the option of two separate bedrooms, a full bathroom with three independent fixtures, a social lounge, a dedicated office area, a comfortable dining space, and a very spacious kitchen. It provides a warm and inviting environment to enjoy, while ensuring that you and your loved ones remain safe and protected from any potential danger.

TITAN – X-LARGE

Total Interior Area: 1,146 Sqft - 106.51 mt²

This powerful model is a true icon of our technology, allowing the creation of multiple spaces tailored to your needs and preferences, all within a warm and inviting design that is extraordinarily strong from an engineering standpoint.

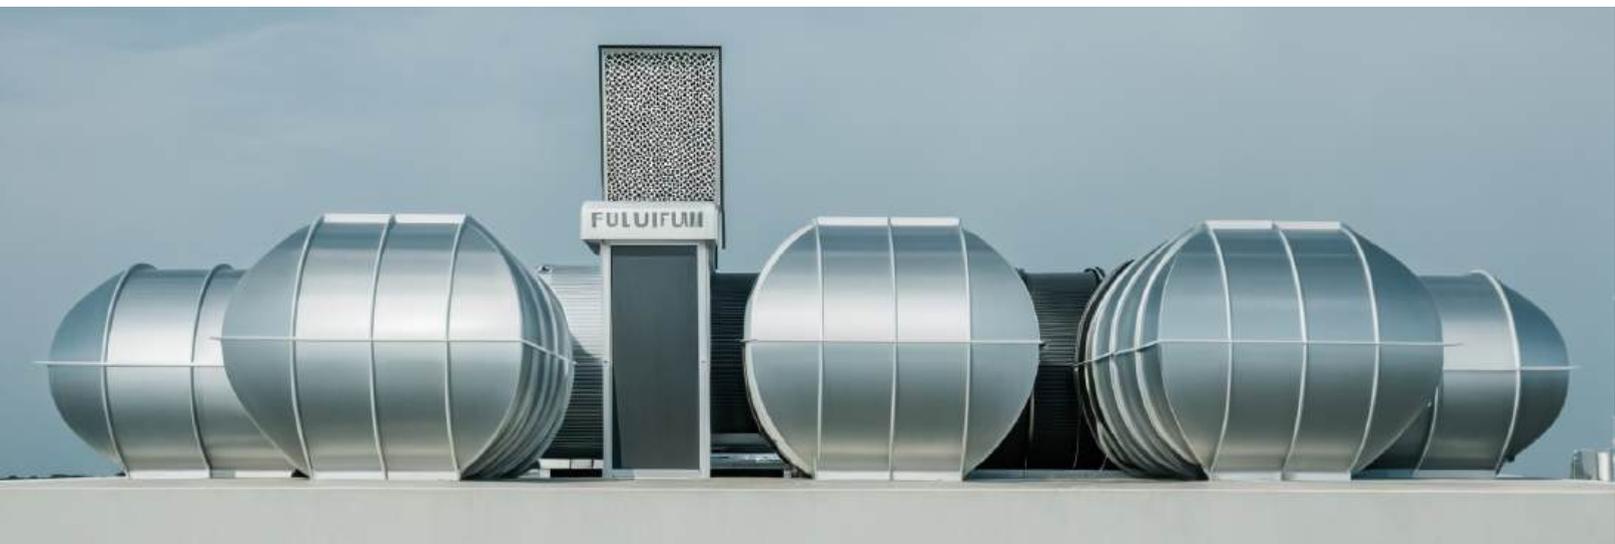

Standard: \$155,045
Anti-Ballistic: \$176,743
Anti-Missile: \$191,211

This model can be easily adapted for multiple uses, as shown here, featuring three independent bedrooms, two bathrooms with six separate fixtures, a comfortable office, a meeting room, a TV lounge, an eight-seat dining area, and a spacious, inviting kitchen that makes its occupants feel truly at home.

HELIOS Bunker-Home

Studio

Total Interior Area: 178.25 Sqft - 16.56 mt2

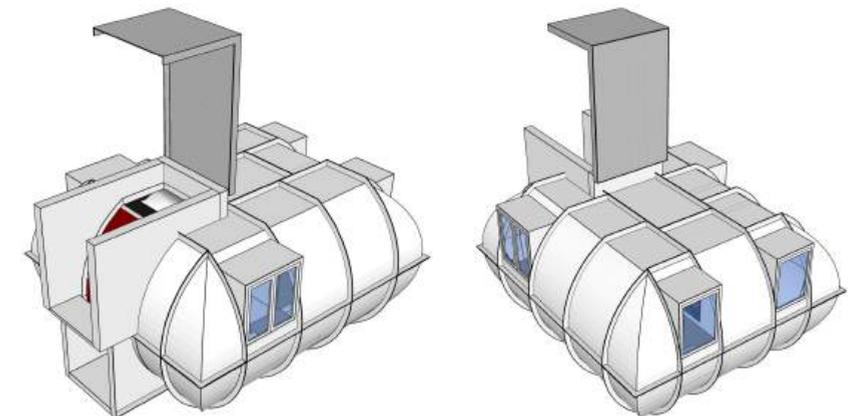

This innovative model is a combination of a security bunker and a residence, half built underground and half above ground. It features secure doors and windows and, if you wish, can be covered with concrete or natural earth and vegetation, including decorative gardens, all supported by exceptionally robust engineering.

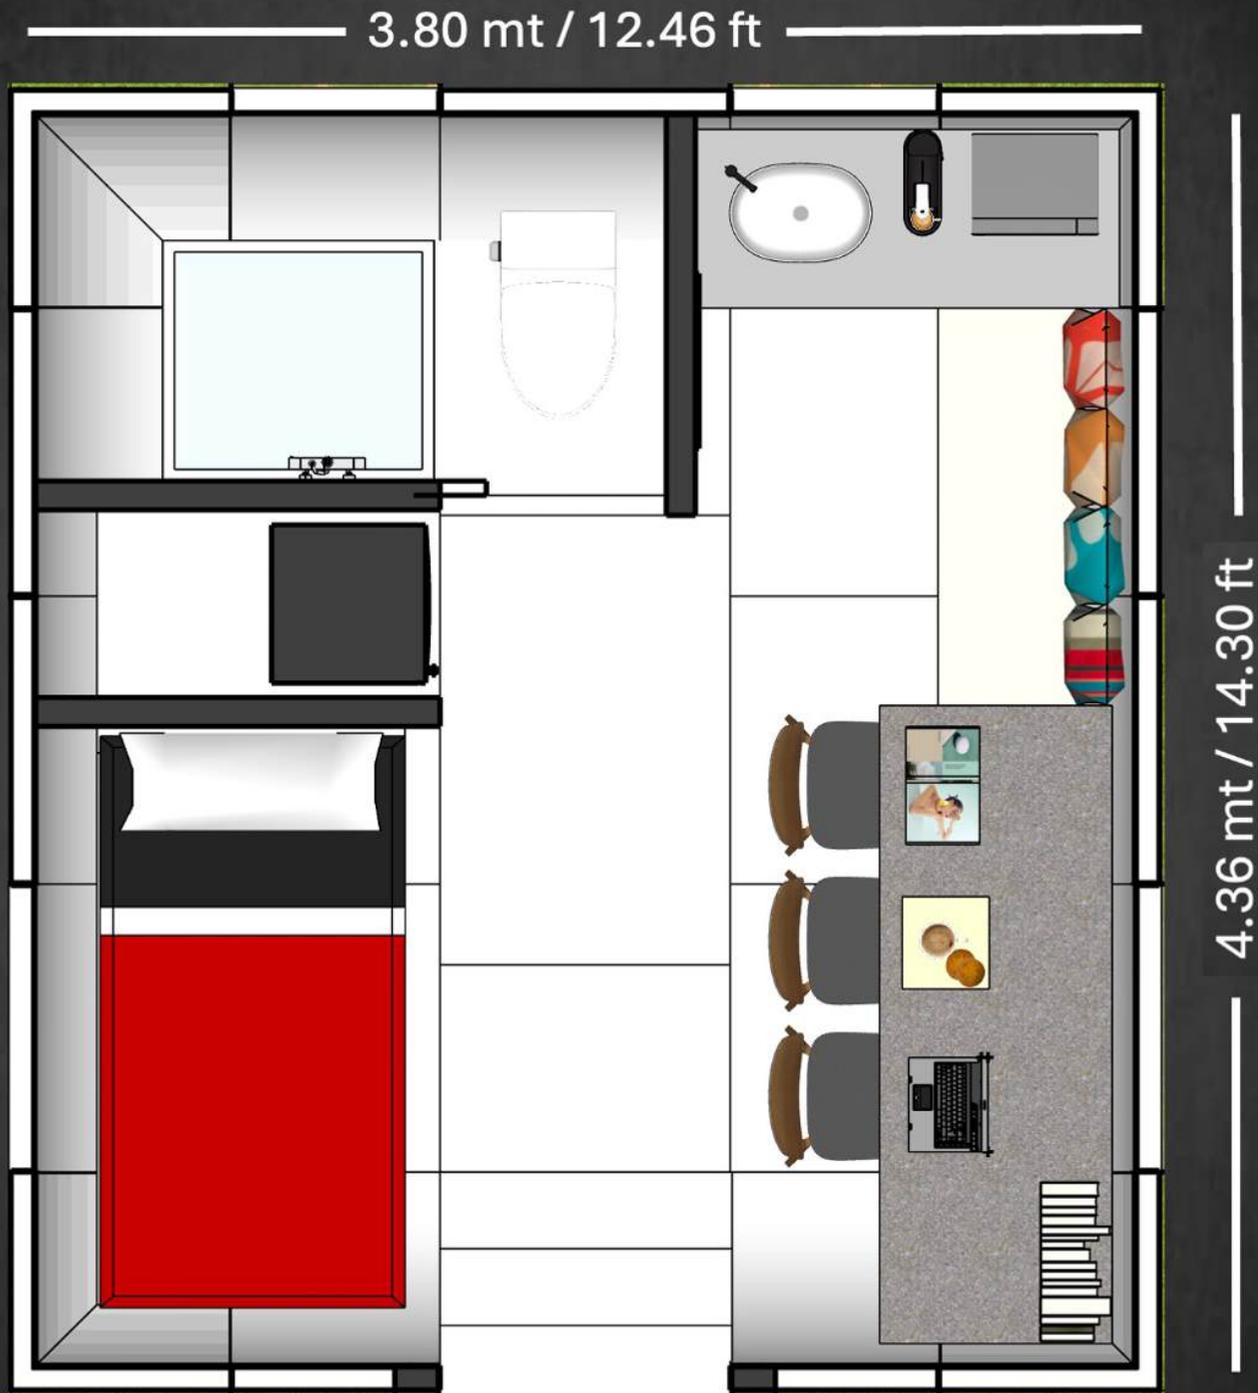

Standard: \$28,988

Anti-Ballistic: \$32,945

Anti-Missile: \$35,581

This type of architecture is a groundbreaking innovation, never seen before, ideal for areas prone to tornadoes and hurricanes or simply as safe-haven spaces. It can also be configured as hotel rooms or Airbnb rentals, making this concept both a profitable and secure option.

ARTEMIS Bunker-Home

One-Bedroom

Total Interior Area: 317.21 Sqft - 29.47 mt²

This beautiful model is ideal for a small family seeking to enjoy optimized living spaces in a secure environment. It offers all the essential comforts for a good quality of life, harmoniously integrated with nature and surrounded by the safety and privacy provided by our technology.

Standard: \$52,846

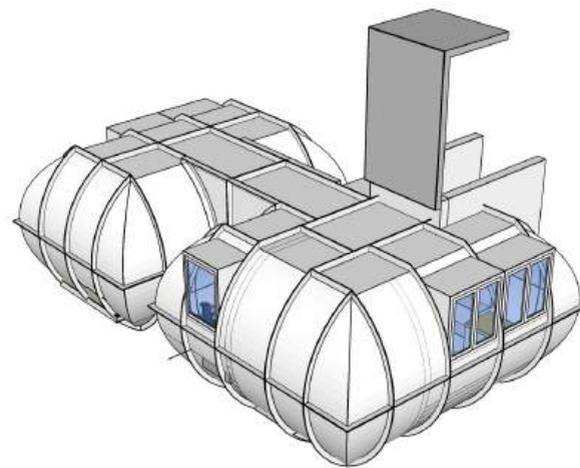

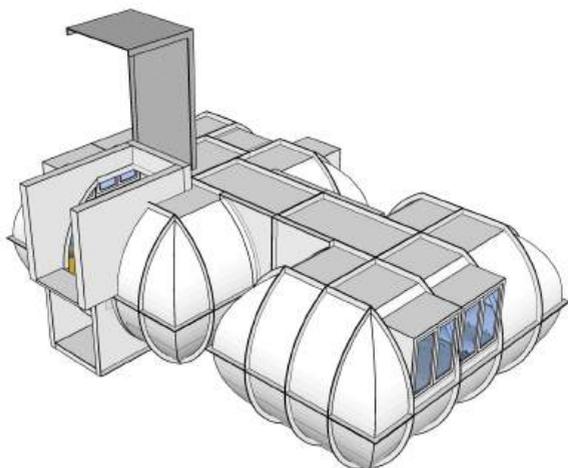

Anti-Ballistic: \$60,206

Anti-Missile: \$65,112

One of the great advantages offered by our bunker-style homes is the bio-climatization of the interior spaces, achieved by being partially underground and taking advantage of geothermal stability. This significantly reduces energy consumption while greatly enhancing safety against unexpected natural events.

BOREAS Bunker-Home

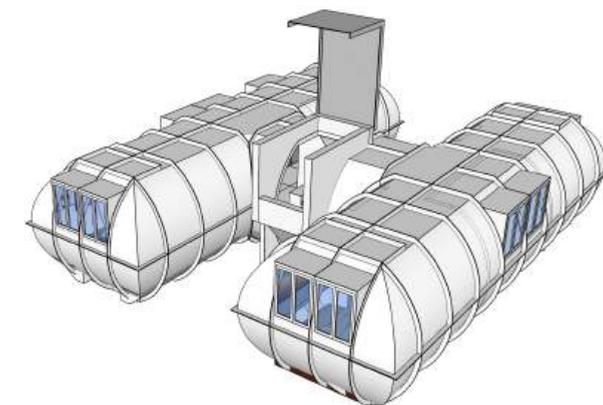

Two-Bedroom

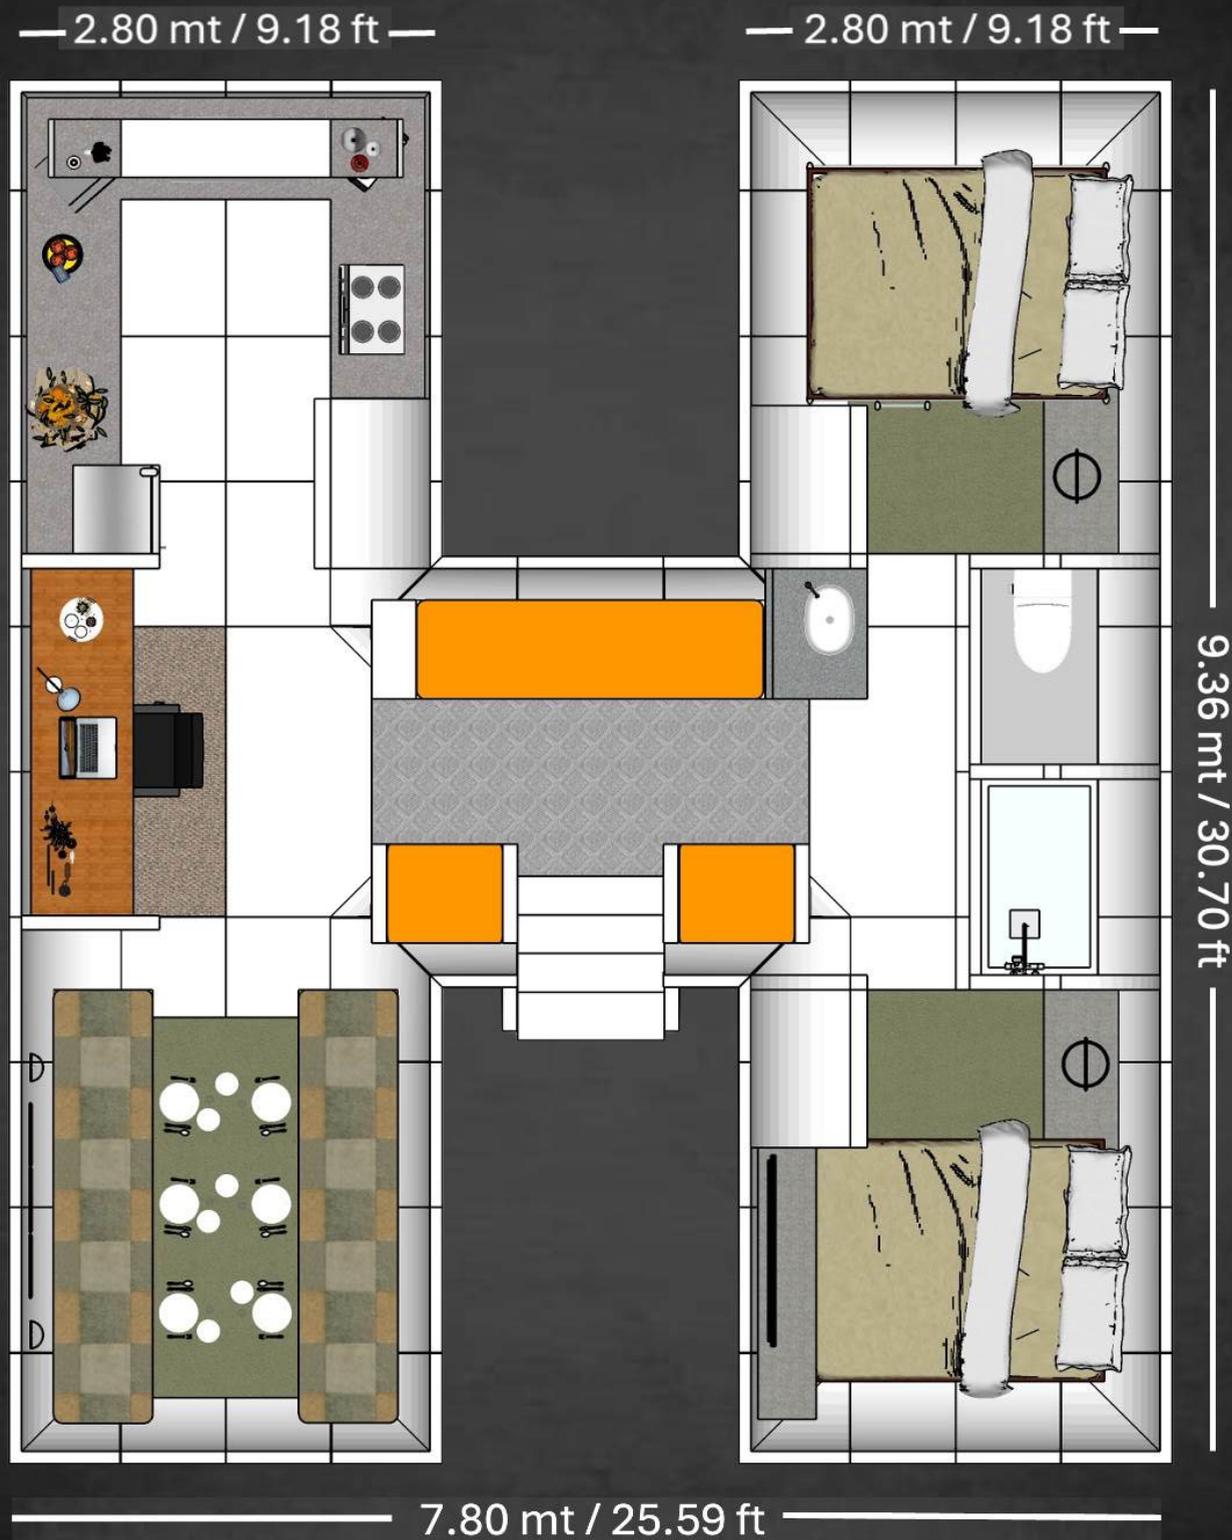

Total Interior Area: 630.44 Sqft - 58.57 mt2

This beautiful model is one of the most sought after for its spatial proportions and aerodynamic architectural design, offering spacious, bright, and well-ventilated interiors that invite you to enjoy them to the fullest.

Standard: \$84,948
Anti-Ballistic: \$96,705
Anti-Missile: \$104,544

Its interior can be easily adapted to any type of layout according to your needs. Here you can see a comfortable model with two bedrooms, along with social and work areas, all within a warm and inviting environment that fosters tranquility and inner harmony.

ATLAS Bunker-Home

Three-Bedroom

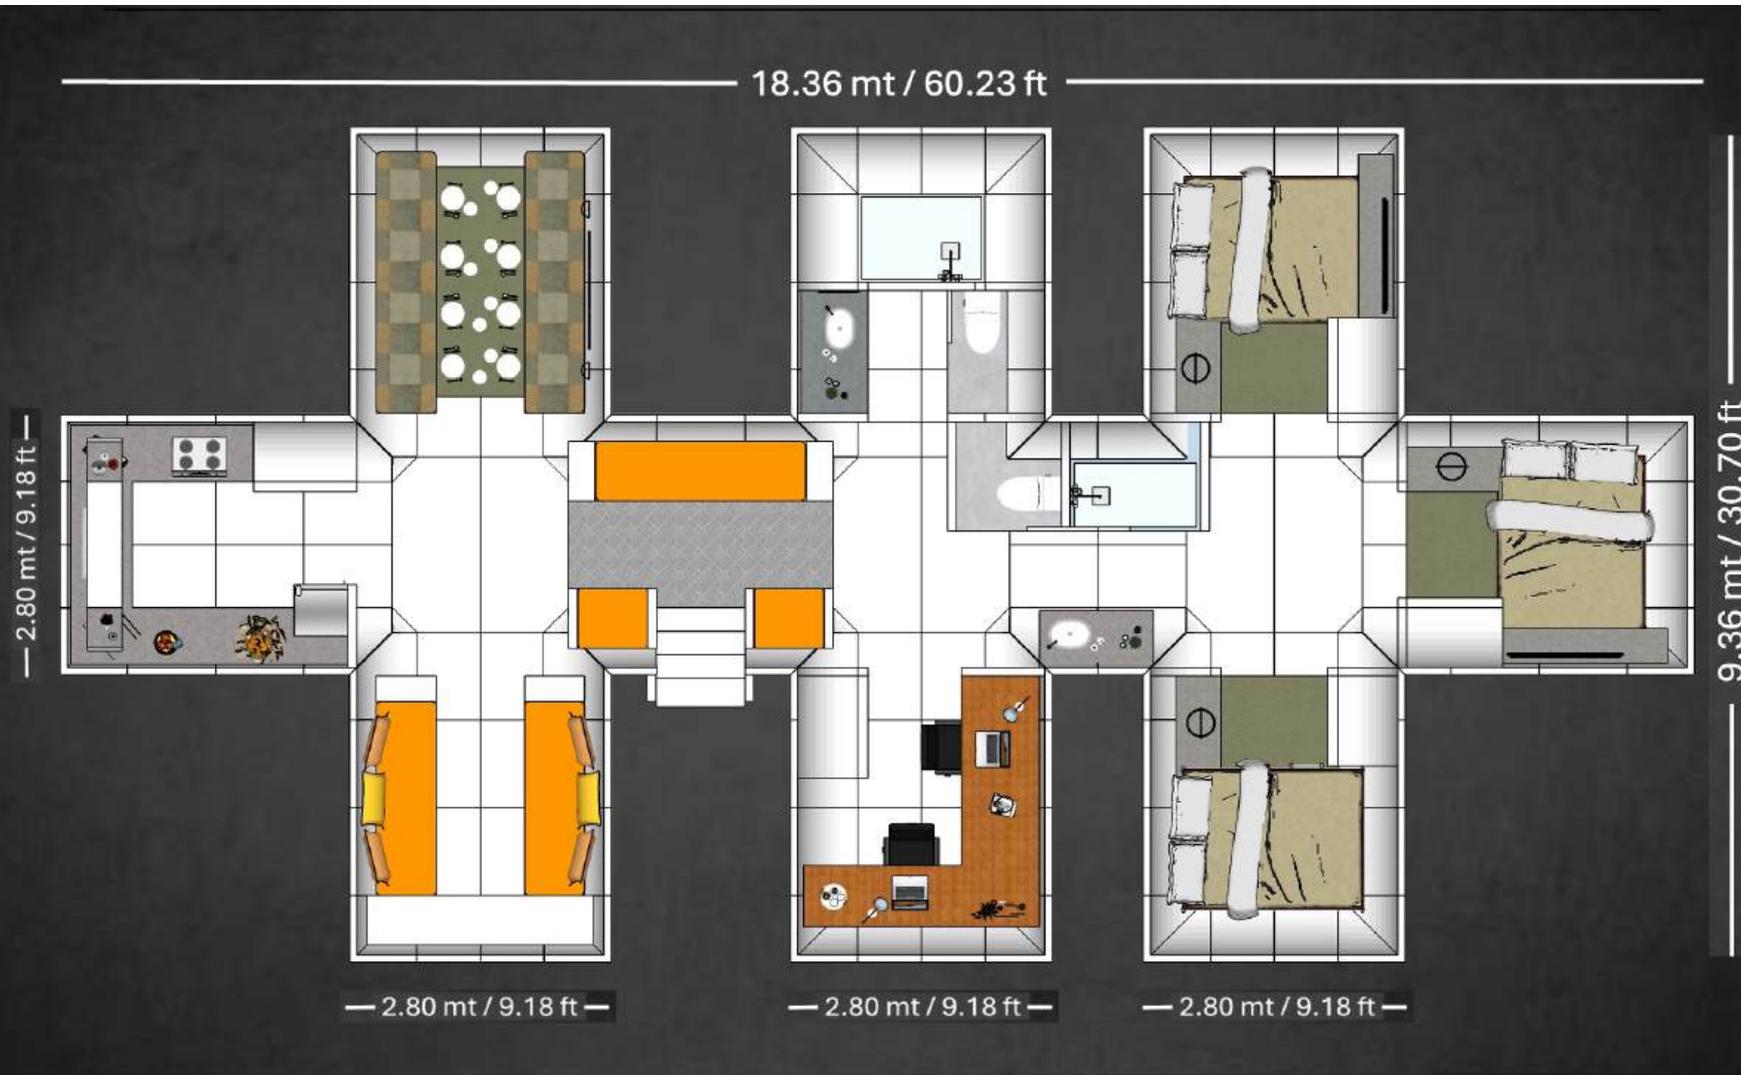

Total Interior Area: 1,146 Sqft - 106.51 mt2

This powerful and robust model is a true pleasure to experience, offering the flexibility to be adapted to your preferences. With multiple spaces and environments, it allows your imagination to soar, resulting in a unique, magical, and completely secure living space.

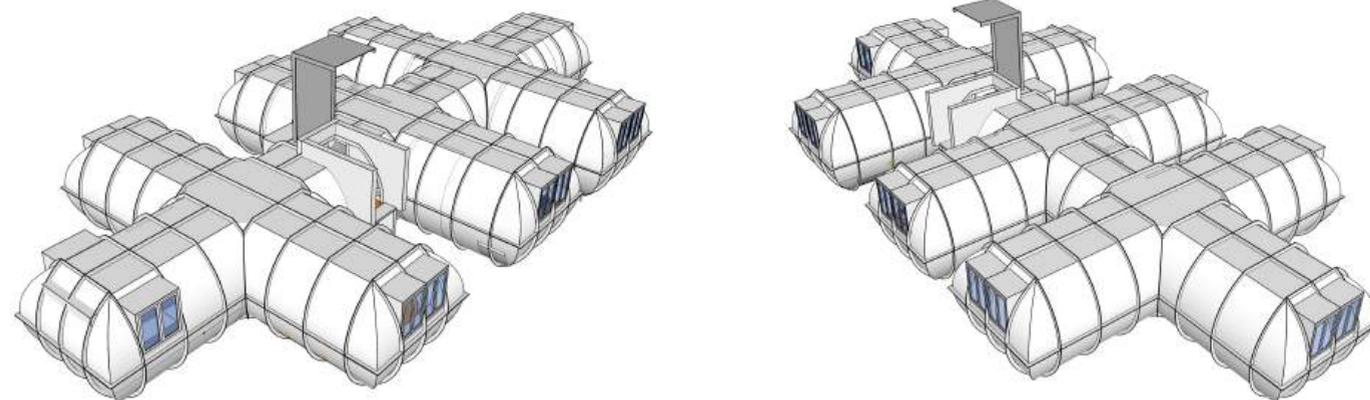

Standard: \$154,947
Anti-Ballistic: \$176,637
Anti-Missile: \$191,096

This three-bedroom home offers all the spaces needed to enjoy a truly unique experience in a highly innovative, futuristic setting. Combined with thoughtful interior design, it creates a magical atmosphere you won't want to leave.
